

CREST RAISE AT TAILINGS STORAGE FACILITY 1A

On the 6th of November, we will be starting work on a crest raise for Tailings Storage Facility 1A. This will make the storage facility 1.8 m higher and provide additional tailings capacity for our existing mining operations. The work is weather dependent, and is expected to continue through to the end of March 2024.

Construction of the crest raise will require earthworks, so you may see machinery operating on the top of the facility. There will be a range of measures in place to ensure any impacts associated with the crest raise are managed in accordance with our consent conditions. The conditions of these consents require that noise and dust monitoring is carried out in line with the relevant New Zealand standards, and that representative samples are recorded.

HOURS OF OPERATION

Between 7.00 am and 7.00 pm weekdays
Between 7.00 am and midday on Saturdays.
There will be no work carried out on Sundays or public holidays.
